Dear Sir/Madam,

Application for Full time job

I am Disha Dharwar and I have pursued my Masters in Computer Science at Nitte Meenakshi Institute of Technology, Bangalore, India in November 2016 and I have completed my Bachelors in Computer Science at KLE College of Engineering and Technology, Belgaum in 2014. I have done my student internship for 6 months at Tata Consultancy services, Bangalore in 2015 where in I mainly worked on Android application development.

Currently I am learning Node.js on my own from Udemy to acquire some skills on it. Along with this, I am attending a Deutsch course where I am learning B1 level of German and will finish it's examination soon.

I started developing my interest in programming during my Bachelors as I had taken many programming subjects in my first semester. This interest helped me to code better in the final year project of my Bachelors. As a fresher now, I want to pursue a career that is prolific and challenging. I want to build an innovative career at your organization by using my skills and other significant talents.

I did my Masters thesis with the topic "Detection of Unusual Crowd Activity in Video Surveillance". The project was developed using MATLAB. It mainly aims at detecting the abnormal crowd activity using optical flow and motion influence map techniques.

During my internship at Tata Consultancy Services, I worked on android application development. I developed three Android applications out of which, two were static applications and one dynamic application. The dynamic app named “Social heartbeat” was developed for the corporate social responsibility team of the company. The static apps were developed for the events conducted in the company.

I hope that my profile sounds interesting to you and if you agree that my qualification seems to match the position, I hope to schedule an interview at a mutually convenient time. I am looking forward to speak to you as I am eager to find out more about the position and welcome the opportunity to do so in an interview.

Thank you for considering my application.

Sincerely,

Disha Dharwar
